
ANNALS OF THE NEW YORK ACADEMY OF SCIENCES

Volume 452

October 31, 1985

**SIXTH INTERNATIONAL CONFERENCE ON
COLLECTIVE PHENOMENA:
REPORTS FROM THE MOSCOW
REFUSNIK SEMINAR**

Editors

INGA FISCHER-HJALMARS and JOEL L. LEBOWITZ

CONTENTS

Foreword. <i>By</i> INGA FISCHER-HJALMARS	ix
Dear Reader. <i>By</i> JOEL L. LEBOWITZ.....	xi
An Open Letter from Academy Officers. <i>By</i> KURT SALZINGER, WILLIAM S. CAIN, and JOEL L. LEBOWITZ	xiii
Historical Perspective: Refugee Scientists and Nuclear Energy. <i>By</i> EMILIO SEGRÈ.....	xv
Statistical Methods of Optimizing Varied-Route Problems in the Scheduling Theory. <i>By</i> D. I. GOLENKO.....	1
Using Metric Space in Problems of Optimal Calendar Planning. <i>By</i> D. I. GOLENKO	11
Approximated Statistical Methods in Optimization Problems of the Scheduling Theory. <i>By</i> D. I. GOLENKO	23
On the Absorption of Extra Low Frequency Electromagnetic Waves in the Magnetoplasma, Taking into Account Collisions between Electrons and Ions of the Same Kind. <i>By</i> YA. L. AL'PERT.....	31
On The Theory of Mass Behavior in Developed Human Communities. <i>By</i> J. CHERNJAK, A. LEONOV, and A. LERNER.....	44
Optimal Design of Metal Shells. <i>By</i> MARK I. REITMAN	54
The Interface Resistance between a Normal Metal and a Dirty Superconductor. <i>By</i> A. B. PIPPARD	64
Sphericalized Molecular Interactions: A Review. <i>By</i> J. K. PERCUS	67
Collective Phenomena and Particle Physics. <i>By</i> HARRY J. LIPKIN	79
Characteristics of the Polar Cusp Region: Optical and Geomagnetic Manifestations of Solar Wind-Magnetosphere Interaction. <i>By</i> A. EGELAND and P. E. SANDHOLT	96
Shell Model Analysis of High Spin States and Atomic Masses around ¹⁴⁶ Gd. <i>By</i> A. H. WAPSTRA	114
Green Function Expansions in Nonlinear Field Theories. <i>By</i> S. F. EDWARDS	121

On the Theory of Adhesive Friction of Elastomers. <i>By</i> YU. B. CHERNYAK and A. I. LEONOV	129
Deformability Effects in the Thermodynamics of Sorption by Microporous Sorbents. <i>By</i> YU. B. CHERNYAK and A. I. LEONOV.....	146
The Construction and Application of Variational Principles. <i>By</i> EDWARD GERJUOY	163
Variable Temperature Vibrational Spectroscopy of Some Model Intercalation Compounds. <i>By</i> ROLFE H. HERBER and ARON SALMON.....	186
Competition between Magnetism and Superconductivity. <i>By</i> J. ASHKENAZI, C. G. KUPER, M. REVZEN, and A. RON	197
Fractals in Statistical Physics. <i>By</i> AMNON AHARONY	220
Extending McCarthy's Idea on Problem Definition. <i>By</i> EUGENE GRECHANOVSKY.....	226
Low-Frequency Spectra of Molecular Liquids and Solutions. <i>By</i> E. PRAESTGAARD and O. FAURSKOV NIELSEN	249
The Riemann Boundary Value Problem on Open Riemann Surfaces with Null Boundary. <i>By</i> YU. L. RODIN	255
Laser-Induced Glass-Crystallization Kinetics of GeSe ₂ Investigated by Light Scattering. <i>By</i> M. BALKANSKI, E. HARO, Z. S. XU, J-F. MORHANGE, G. P. ESPINOSA, and J. C. PHILLIPS.....	275
The Development and Construction of General Nonlinear Models in Time Series Analysis. <i>By</i> M. B. PRIESTLEY.....	296
Genetic Engineering and Site-Specific Mutagenesis: Strategy of Interplay. <i>By</i> VALERY N. SOYFER	305
Quantum Interference Effects in Small Normal-Metal Rings. <i>By</i> YOSEPH IMRY	312
On an Incompletely Determined Model for Function Approximation by Experimental Data. <i>By</i> V. BRAILOVSKY.....	316
The Physical Meaning of Path Integration. <i>By</i> N. N. MEIMAN	334
The Two Gauge Fields of Elasticity and Plasticity. <i>By</i> H. KLEINERT	349
On the Measure of Large Trigonometric Sums. <i>By</i> G. A. FREIMAN.....	363
Trends in the Application of Molecular and Cell Biology to Current and Future Agronomy. <i>By</i> VALERY N. SOYFER.....	372
Representatives of the Group of Diffeomorphisms in the Physics of Particles, Gravity, and Fluids. <i>By</i> YUVAL NE'EMAN.....	390

Poster Papers

On Some Computational Properties of Irregular Grids. <i>By</i> M. S. FOX-RABINOVICH	395
On Computational Dispersion Properties of Different Finite-Difference Schemes and Grids Used for Solving Hydrodynamical Primitive Equations in Numerical Atmospheric Modeling. <i>By</i> M. S. FOX-RABINOVICH.....	396
On the Long-Time Behavior of the Solutions of Quasi-Linear Parabolic Equations with Small Parameter. <i>By</i> M. FREIDLIN.....	397

On the Local Surjection Property in Banach Spaces. By A. IOFFE	399
Thermodynamic Approach in the Structure Analysis of Crystals. By S. SEMENOVSKAYA, K. KHACHATURYAN, and A. KHACHATURYAN	400
Energy Metabolism and Feeding Requirements in Fish of the Order Clupeiformes with Short Life Cycles. By E. P. SKAZKINA	401
Factors of Effectiveness of Acaricide Treatments. By IGOR USPENSKIY and INNA IOFFE-USPENSKIY	402
Susceptibility of <i>Ixodes persulcatus</i> P. Sch. (Acarina, Ixodidae) to DDT in Different Stages and Physiological Conditions. By IGOR USPENSKIY and MARIA RUBINA	403
Season Specificity of the Oocyte Growth and Their Definitive Size in the Gray Mullet, <i>Mugil cephalus</i> L. By VLADIMIR S. APEKIN	404
Technique of Obtaining Mature Eggs of the Gray Mullet, <i>Mugil cephalus</i> L. By VLADIMIR S. APEKIN	405
Comparison of Altozar and DDT Effects on Tick Females during and after Feeding. By I. D. IOFFE and I. V. USPENSKIY	406
Hierarchical Presentation of Algorithm (HPA). By ILJA V. KOGAN and IGOR I. KOGAN	407
The Hypothesis of the Model of Insulin Synthesis Regulation. By D. P. SHRAER	409
Index of Contributors	411
